

Banham Steel burglar resistant security door perfect for domestic or commercial applications, proven to protect from a prolonged attack of 20 minutes. The door was awarded the class 3 (WK3) according to ENV 1627 standard (the third highest in the group 1 being the lowest). The lock installed in this door must be protected by a drill proof plate. During the Fire Test carried out by IFT Rosenheim laboratory in Germany, the door set exceeded an hour and withstood temperatures in excess of 1000°, making it perfect for boiler/generator rooms.

- Security tested to ENV 1627
- 1 hour fire rated to EI60*
- Multi-locking system for security
- 4 x 16mm protective bolts on the hinge side
- Lock is protected by drill resistant plate
- Finishes in RAL colours available

* E = indicates stability I = indicates insulation
